Best-fit Line

Forecasting Methodologies · https://dev.forecastpro.com/documentation/forecast-pro-trac/forecasting-methodologies/best-fit-line/

Select *Best-fit Line* icon on the **More** icon drop-down on the **Forecasting** tab or select *Forecasting* > *Curve Fit* > *Straight Line* on the Navigator's context menu to fit a straight line to the data.

- ***\CFIT=LINE*** is the modifier to fit a straight line to the data set.
