Locked and Unlocked Modes

Changing the display units and/or altering the hierarchy will “lock” the statistical forecasts. When the statistical forecasts are locked, you are no longer able to change the statistical forecasting methods used to generate the statistical forecasts and the sections of the Forecast Report that pertain to the statistical modeling (i.e., Expert Analysis, Model Details, Within-Sample Statistics, Out-of-Sample Tests and Outliers) are omitted. If you subsequently return to the default state (i.e., default units and default hierarchy) the statistical forecasts will be “unlocked.”
