

What's New in Forecast Pro Extended* V14

**Formerly known as Forecast Pro Unlimited*

Compare Forecasts Utility

- ✓ Forecast Pro now includes a Compare Forecasts Utility (CFU), making it easy for you to determine the best forecasting method to use.
- ✓ CFU allows you to view the compared forecasting models graphically, in the override grid, and forecast report. If you want to use the comparison forecast, you can easily implement it with one click.

Single-Click Updates

- ✓ Forecast Pro V14 will notify you when an update is available and allow you to download and install the update with a single click, so you can be sure your software is always up-to-date with the latest features and improvements.
- ✓ Forecast Pro Extended V14 includes a new license manager allowing you to seamlessly manage and transfer licenses.

Improved Performance

- ✓ Forecast Pro V14 supports multi-core processing, which enables the software to complete tasks much faster by dividing them among multiple processing units (cores).
- ✓ Multi-core processing provides scalable solutions that can handle complex and data-intensive tasks. So even if you are forecasting thousands of items, Forecast Pro can effectively handle your business needs.
- ✓ Version 14 also includes improved performance logic throughout and offers more user-controlled performance settings.
